<u>Windows 10 – Check for Windows Updates</u>

1. Right click on the start button in the bottom left of the screen

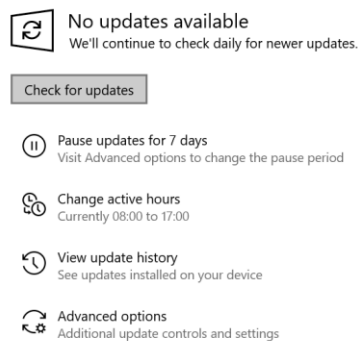

2. Click "Settings"
3. Click "Update & Security"

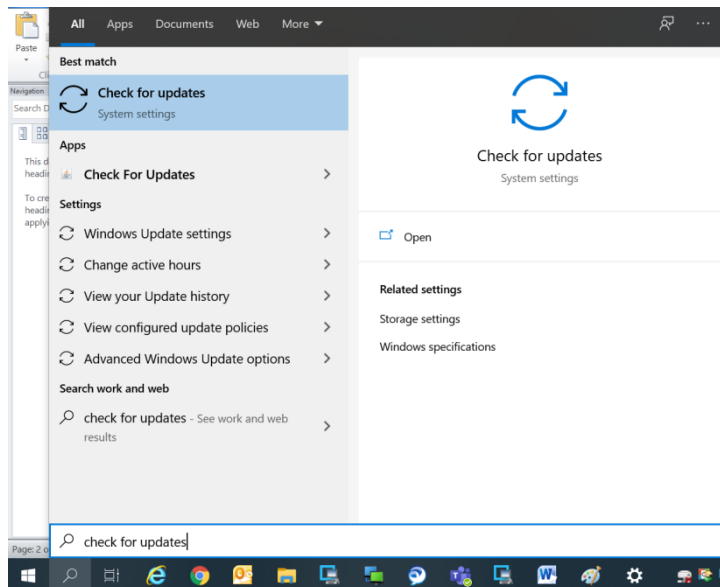

4. Click the "Check for Updates" button

8th July 2020

5. Depending on network and internet speeds, it should then return a list of available updates to download and install. There may even be updates already downloaded just waiting for you to click install updates.

There are quite a few different ways of getting to the Windows Update screen. Another method would be to search for "Check for Updates" in the search button in the bottom left of your screen

Your search icon might not look like the above screenshot; it may look like the screenshot below.
